Please note that your Social Work degree is a generic degree; consequently, the choice of an emphasis does not restrict you to working in that area. However, it may give you a competitive edge if you choose to work within your emphasis.

Practicum

Practicum is an essential part of the social work programme. Each student is required to complete 680 hours of practicum during their course of study. You qualify for Practicum after successfully completing the core courses of Years I and II and the first assessment. The first 170 hours of your practicum will be completed during one semester while you are registered for Foundations of Practice I and Field Instruction I. The following semester, you will complete the second 170 hours of practicum while registered for Foundations of Practice II. Your final 340 hours of practicum will be completed in your last year of the programme, registering for Field Instruction II & Foundations of Practice III. Students pursue Foundations of Practice III, and BSW Professional Seminar during their final year of study. BSW Seminar is the final course.

Students who are interested in placements in Psychiatric Social Work are required to complete PSYC460 Psychology of Abnormal Behaviour **before** starting practicum.

Assessments

You are required to participate in two assessments during your social work training at USC. The first assessment will be held at the end of the second year

and will take the form of a formal interview. This determines your eligibility for practicum.

The second assessment will take place at the end of your fourth year and will be conducted as part of the BSW Professional Seminar. This determines your eligibility to graduate.
